# DGCI 1994: Grenoble, France

## 4th DGCI, Grenoble, France, September 19-21, 1994.

| Program Committee | | Conference Committee | |
|---|---|---|---|
| Jean Françon | ULP Strasbourg | Jean-Marc Chassery | IMAG Grenoble |
| Vladimir Kovalevsky | TF Berlin | Annick Montanvert | ENS Lyon |
| Walter Kropatsch | TU Vienna | Paulette Souillard | INPG Grenoble |
| Michel Mériaux | LIFL Lille | | |
| Claude Puech | IMAG Grenoble | | |
| Jean-Pierre Réveillès | ULP Strasbourg | | |
| Denis Richard | Univ. Clermont-Ferrand | | |

Table of Contents

Gunilla Borgefors, Gabriella Sanniti di Baja:
Filling 2D and 3D Concavities for Shape Analysis 1

Vito Di Gesu, Rosalia Renda:
Digital Straight Lines Intersections 11

Jean-Marc Chassery:
Coding and Counting XY-Convex Figures: Application to Percolation 21

Peter Veelaert:
Designing Perceptrons for the Recognition of Digital Straight Lines 35

Nicolas Rivier:
Discrete Geometry in Nature: Grain Boundaries in Flowers and Metals 45

Jean-Christophe Spitz:
Digital Geometry and Antialiasing: a Discrete Line Algorithm 53

José Delfosse, William Terrence Hewitt, Michel Mériaux:
An Investigation of Discrete Ray-Tracing 65

Christian Metge, René Caudet:
A Discrete Global Illumination Method 77

Jean-Michel Muller:
Exotic Systems for Representing Numbers 89

Grzegorz Siemek:
Background Tree Representation of Images 99

Igor Metz:
Finding Neighbours in d-Dim.Binary Digital Images Represented by Bintrees 107

Emmanuel Piegay, Nazha Selmaoui, Claire Leschi:
Multiresolution and Extreme Lines in Grey Level Images 117

Leo Dorst, Rein Van Den Boomgaard:
Orientation-based Representations for Mathematical Morphology 127

Gilles Bertrand:
On the Computation of Topological Numbers 137

Didier Coquin, Yousra Chehadeh, Philippe Bolon
3D Local Distance Operator on Parallelepipedic Grids 147

Philippe Borianne, Jean Françon:
Reversible Polyhedrization of Discrete Volumes 157

Gabor Szekely, Markus Näf, Olaf Kübler:
Skeletal Description of Complex 3D Shapes with Applications to Brain Anatomy 169

Jacques-Olivier Lachaud, Eric Bainville
A Discrete Adaptive Model Following Topological Modifications of Volumes 183

Serge Miguet, Virginie Marion-Poty:
A New 2D and 3D Thinning Algorithm Based on Successive Border Generations 195

Isabelle Debled-Rennesson, Jean-Pierre Reveillès:
An Incremental Algorithm for Digital Plane Recognition 207

AUTHORS

Bainville Eric. 183
Bertrand Gilles 137
Bolon Philippe... 147
Borgefors Gunilla.... 1
Borianne Philippe..... 157
Caudet René..... 77
Chassery Jean-Marc.... 21
Chehadeh Yousra... 147
Coquin Didier... 147
Debled-Rennesson Isabelle... 207
Delfosse José... 65
Di Gesu Vito... 11
Dorst Leo... 127
Françon Jean. 157
Hewitt William Terrence... 65
Kübler Olaf... 169
Lachaud Jacques-Olivier.. 183
Leschi Claire... 117
Marion-Poty Virginie... 195
Mériaux Michel... 65
Metge Christian... 77
Metz Igor... 107
Miguet Serge... 195
Muller Jean-Michel.. 89
Näf Markus.... 169
Piegay Emmanuel... 117
Renda Rosalia... 11
